SUBJECT INDEX *

A

ABSTRACTS Proceedings of the 62nd Annual Meeting of the American Society for Clinical Investigation, Inc., held in Atlantic City, N. J., 4 May 1970, 1301

Acetylsalicylic acid
hemolysis induced by in patients with glucose-6-phosphate dehydrogenase deficiency, 1334

Acidosis
by ammonium chloride, effects of on urinary calcium and magnesium excretion, in man, 1458
effect of water restriction and, on experimental *E. coli* pyelonephritis, 21
metabolic, early effects of on renal metabolism, in rat, 943

Acromegaly
pulmonary function in patients with, 1051

Actinomycin D
effect on insulin secretion in rat, 881

Adenosine monophosphate
in human plasma and urine, effects of glucagon on, 2237
in human plasma and urine, effects of parathyroid hormone on, 2387
kinetic parameters and renal clearance of in man, 2222

Adipose cells
human, lipolysis and lipogenesis from glucose in, 1213

Adipose tissue
carbohydrate metabolism in, in late pregnancy, 1438

Adrenal insufficiency
role of antidiuretic hormone in inhibition of water diuresis in, reversal by gluco- and mineralocorticoids, 1724

Adrenergic blockade
alterations on hemodynamic effects of elevated cerebrospinal fluid pressure, 1324

Albumin
effect of corticosteroids on synthesis of in hepatocellular disease, 2198

Aldosterone
secretion of during salt loading in patients with hypertension, relation to plasma renin activity, 1415
transplacental passage and fetal secretion of, 1389

Alkaline phosphatases
induction of in rat liver, mechanism of serum elevation in bile duct obstruction, 508

Allopurinol
effect of on purine synthesis in cultured human cells, 602

Alveolar capillary block
diffusing capacity and ventilation, perfusion ratios in patients with clinical syndrome of, 408

Alveolar macrophage
during phagocytosis, catalase-dependent peroxidative metabolism in, 1280

Amino acid transport
by intestine of diabetic rat, 96
kinetics of across bone marrow cell membranes, 752

Amino acids
effects on pancreozymin bioassay in man based on pancreatic enzyme secretion, 1558

Ammonia
production by kidney, in rat, early effect of metabolic acidosis, 943
production by renal cortex, relation to gluconeogenesis and glutamate content, 1967

Amphotericin B
defect in urinary acidification induced in vitro by, in turtle bladder, 596

Anal sphincter
human, electrophysiology, 41

Anaphylatoxin inactivator
of human plasma, isolation and characterization as carboxypeptidase, 2427

Anemia
of bone marrow failure, erythropoietin in, 1986
sex-linked, hereditary defect of intestinal iron transport in, 1869

Antibodies
antinucleoside, fluorescein-labeled, localization of in glomeruli of patients with active systemic lupus erythematosus nephritis, 2106
to human glomerular basement membrane, elution from glomerulonephritic kidneys, 308

Antibodies IgM and IgG
hemagglutination study of erythrocyte antigen site density, 87

Antibody
cell-bound, detection of on complement-coated human red cells, 898

Antibody response
to group A streptococci, influence of site of infection on, 1405

Anticoagulant
to factor V, clinical, biochemical, and immunological observations, 1578
warfarin, identification of metabolites of in urine, in man, 907

Anticoagulation
therapeutic, isotopic studies of, with coagulating enzyme, 1872

Antidiuretic hormone
role of in inhibition of water diuresis in adrenal insufficiency, reversal by gluco- and mineralocorticoids, 1724

Antigen
leukemia-associated, lack of in identical siblings, 2271

Antigen site
density of on erythrocytes, 87

Antigens
streptococcal plasma membrane components in acute glomerulonephritis, 762

Antilymphocyte globulin
immunologic response of graft recipients to, effect of prior treatment with aggregate-free gamma globulin, 1589

Antisera
identification of neurohypophysial hormones by, 828

Aorta
human, lipid droplets in atherosclerotic fatty streaks of, 1479

Atherosclerosis
and hyperlipoproteinemia, body cholesterol metabolism in, long-term decay of serum cholesterol radioactivity, 346
lipid droplets in fatty streaks in human aorta, 1479

Atrial fibrillation
effect of on left ventricular function, pressure-flow studies in man, 472
role of inotropic variation in ventricular function during, 738

* Abstracts listed in the Proceedings of the 62nd Annual Meeting of The American Society for Clinical Investigation, Inc., 4 May 1970, are not included in this index.

Atrial function
in valvular heart disease, 1605

B

Baboon
measurement of exchangeable pools of cholesterol in, 655
Bactericidal activity
of polymorphonuclear leukocyte, effect of NADH oxidase inhibitor (hydrocortisone) on, 1381
Baroreceptors
role of skin and muscle resistance vessels in reflexes mediated by, 225
Beta-sitosterol
metabolism of in man, 952
Bicarbonate
and pH and P_{CO_2}, regulation by of citrate content in rat diaphragm, 1647
reabsorption, influence of uremia and extracellular fluid volume expansion on, in man, 988
reabsorption, renal, regulation of by extracellular volume, 586
transport in human ileum, 557
Bicarbonate absorption
mechanism of, relationship to sodium transport in human jejunum, 548
Bile duct obstruction
mechanism of serum elevation of rat liver alkaline phosphatase in, 508
Bile flow
effect on hepatic metabolism of sulfobromophthalein sodium, 206
Bile salts
effects of controlled interruption of enterohepatic circulation of by biliary diversion and by ileal resection on secretion, synthesis, and pool size of, in rhesus monkey, 232
Bilirubin
and carbon monoxide, simultaneous production of in heme catabolism, 914
erythropoietic formation, hemolysis of "stress" reticulocytes, 1025
Biosynthesis
of low molecular weight (7S) and high molecular weight (19S) immunoglobulin M, 150
Blood
factors involved in retraction and lysis of clots and aggregation and retraction of platelets, 2068
Blood flow
intrarenal distribution of, effect of retransfusion on, after hemorrhagic hypotension in dogs, 2205
peripheral, role of skin and muscle resistance vessels in reflexes mediated by baroreceptor system, 225
Bone
formation, mineralization, and resorption of, in vitamin D-deficient rats, 1122
role of proteinpolysaccharides in regulation of mineral phase separation in calcifying cartilage, 2188
Bone composition
in patients with chronic renal failure, 442
Bone marrow
kinetics of amino acid transport across cell membranes of, 752
Bone marrow failure
erythropoiesis in anemia of, 1986
Breathing mechanics
effect of isoproterenol on, in normal man, 779
Breathlessness
in chronic obstructive pulmonary disease, alterations in mechanical properties of lung during, 747
Broad-beta disease
type III hyperlipoproteinemia, abnormal chylomicrons in, 1853
Brushite
saturation of urine with, calcification of collagen, 2353
Byssinosis
respiratory mechanics and dust exposure in, 106

C

C'3 metabolism
abnormality of, in patient with increased susceptibility to infection, 1975
Calcification
of cartilage, role of proteinpolysaccharides in regulation of mineral phase separation in, 2188
of collagen by urine, dependence on saturation with brushite, 2353
Calcitonin
effects of glucagon, dibutyryl cyclic adenosine monophosphate, and theophylline on in vitro secretion of, 1368
radioiodinated, metabolic clearance rate of, in man, 2345
Calcium
concentration in tissue culture of rat parathyroid glands, hormone synthesis and secretion, 1639
effect of on in vitro secretion of calcitonin, 1368
effects of glucose ingestion and ammonium chloride acidosis on urinary excretion of, in man, 1458
in serum and urine, changes during phosphate depletion, 1073
ionized, in normal serum, ultrafiltrates, and whole blood, determined by ion-exchange electrodes, 318
role in secretion of parathyroid hormone, in man, 2146
suppression of parathyroid gland activity by hypermagnesemia, 1619
Calcium transport
by small intestine, effect of renal insufficiency on, 1288
Capillary basement membranes
structure of in diabetics and sexual ateliotic dwarfs, 2161
Carbohydrate
diet rich in, effect on transport of very low density lipoprotein triglycerides in hyperlipoproteinemia, 2281
Carbohydrate metabolism
in adipose tissue during late pregnancy, 1438
Carbon monoxide
pulsatile uptake of, in human lung, 335
Carboxypeptidase
inactivator of anaphylatoxin, isolation of from human plasma, 2427
Cardiac disease
changes in hemoglobin-oxygen affinity and 2,3-diphosphoglycerate in, 1349
Cardiac output
Fick and dye, pulmonary gas exchange in proliferative lung disease, 1311
Cartilage
calcifying, role of proteinpolysaccharides in regulation of mineral phase separation in, 2188
Catabolic rates
short-term measurement of, using iodine-labeled plasma proteins, 1903
Catalase
peroxidative metabolism dependent on, in alveolar macrophage during phagocytosis, 1280
Cell proliferation
in human subcutaneous metastatic melanoma, 1188
Cell renewal
correlation of biochemical aspects of with effect of colchicine on intestinal disaccharidases, 530

Cerebral blood flow
response to acute hypocapnic and eucapnic hypoxia in normal man, 2362
Cerebral oxygen utilization
in vivo measurement of by means of oxyhemoglobin labeled with radioactive oxygen-15, 381
Cerebrospinal fluid
hemodynamic effects of elevated pressure of, alterations with adrenergic blockade, 1324
Ceruloplasmin
role of in iron metabolism, 2408
Chloride
transport in human ileum, 557
Cholera
human, intestinal fluid and electrolyte transport in, 183
Choleresis
induced by hydrocortisone, in dog, 1714
Cholesterol
effects of unsaturated dietary fats on absorption, excretion, synthesis, and distribution of, in man, 1135
long-term decay of serum radioactivity of, metabolism of in normal man and patients with hyperlipoproteinemia and atherosclerosis, 346
measurement of exchangeable pools of, in baboon, 655
Cholesteryl ester
in lipid particles, formation of during metabolism of chylomicrons, 465
Cholinesterase
activity of motor end plate in human skeletal muscle, 936
"silent gene," variations in properties of serum enzyme in apparent homozygotes, 479
Chromium
transport of in human leukocytes, 1551
Chylomicron
origin of lipids accumulating in diabetic eruptive xanthomas, biochemical and morphologic correlations, 2172
Chylomicron metabolism
formation of choesteryl ester–rich particulate lipid during, 465
Chylomicrons
abnormal lipid composition of, in broad-beta disease (type III hyperlipoproteinemia), 1853
Circulation
effect of physical training on mechanical and metabolic performance of rat heart, 1859
peripheral, effect of acute hypoxia on, in man, 1252
Citrate
in rat diaphragm, regulation of by pH, P_{CO_2}, and bicarbonate, 1647
Coagulating enzyme
isotopic studies of therapeutic anticoagulation, 1872
Coagulation
factors involved in retraction and lysis of whole blood clots, aggregation and retraction of platelets, 2068
Cobalt
effect on globin synthesis in reticulocytes and nucleated erythroid cells, 701
Colchicine
effect on intestinal disaccharidases, correlation with biochemical aspects of cellular renewal, 530
Collagen
in vitro calcification of by urine, dependence on saturation with brushite, 2353
and proline content in human liver cirrhosis, 2246
Collagen metabolism
relationship of human urinary O-hydroxylysyl glycoside levels to, 1497
Collagen synthesis
urinary polypeptides related to, 716
Complement
antibodies to in glomeruli of patients with active systemic lupus erythematosus nephritis, 2106
$C\bar{1}$ inactivator inhibition by plasmin, 568
levels in serum, in overt and asymptomatic nephritis after streptococcal skin infection, 1178
Complement-coated red cells
detection of cell-bound antibody on, 898
Connective tissue
interaction of monosodium urate with components of, 1783
Connective tissue diseases
hypercatabolism of normal IgG by patients with, 454
Contractile properties
of isolated rat skeletal muscle, effect of alterations in level of thyroid activity, 849
Contractility
alternating, in pulsus alternans, 1166
Copper
and ceruloplasmin role of in iron metabolism, 2408
Coronary shock
myocardial blood flow and metabolism in, response to norepinephrine and isoproterenol, 1885
Corticoids
gluco- and mineralo-, reversal of antidiuretic hormone inhibition of water diuresis in adrenal insufficiency, 1724
Corticosteroids
effect on synthesis of albumin and fibrinogen in hepatocellular disease, 2198
Cystathionine synthase deficiency
effect of pyridoxine on homocystinuria, 1762
Cytidine diphosphate diglyceride
biosynthesis of, by human platelets, 392
Cytokinetic study
of human subcutaneous metastatic melanoma, 1188

D

Denaturation
of normal and abnormal hemoglobins by oxidant dyes, heat, and alkali, 2369
Deoxygenation
of adult and fetal hemoglobin, effects of on synthesis of red cell 2,3-diphosphoglycerate, 400
Diabetes
eruptive xanthomas, biochemical and morphologic study of chylomicron origin of lipids in, 2172
impedance to insulin-mediated glucose uptake in, 2151
pancreatic alpha cell function in, 837
Diabetes mellitus
capillary basement membrane structure, comparison with sexual ateliotic dwarfs, 2161
growth hormone response to exercise in, 1467
in rats, intestinal transport of sugars and amino acids, 96
and sexual ateliotic dwarfism, comparative study, 1096
Dibutyryl cyclic 3′,5′-adenosine monophosphate
effect of on in vitro secretion of calcitonin, 1368
Differentiation
of cells of intestine, effect of colchicine on disaccharidases of, 530
Diffusing capacity
and ventilation, perfusion ratios in patients with alveolar capillary block, 408

Digitalis
efficacy and toxicity of, in acute and healing phase of myocardial infarction, in dogs, 358

Digoxin
intoxication, relationship of serum concentration of to clinical presentation, 2377

Dihydrotestosterone
in hypertrophic prostate of dog, 1746
in hypertrophic prostate of man, 1737

Diphenylhydantoin
effect on thyroxine metabolism in man, 1266
in vitro inhibition of insulin secretion by, 1942

2,3-Diphosphoglycerate
effect of on oxygen affinity of blood in sickle cell anemia, 806
in cardiac disease, relation to hemoglobin-oxygen affinity, 1349
interaction with various human hemoglobins, 1088
of erythrocytes, effects of deoxygenation of adult and fetal hemoglobin on synthesis of, 400

Diphosphoglycerate mutase
effect of thyroid hormones on, 1993

2,3-Diphosphoglyceric acid
effect of thyroid hormones on synthesis of, in erythrocytes, 1993

Dopamine
responses of saphenous and mesenteric veins to administration of, 259

Down's syndrome
DNA polymerase activity as index of lymphocyte stimulation in, 161

DNA
denatured, antibodies to in glomeruli of patients with active systemic lupus erythematosus nephritis, 2106

DNA polymerase activity
index of lymphocyte stimulation, in Down's syndrome, 161

Drug
antagonism of norepinephrine pump in man, guanethidine and related agents, 1596

Dwarfism
sexual ateliotic, and diabetes mellitus, comparative study, 1096

Dwarfs
sexual ateliotic, capillary basement membrane structure, comparison with diabetics, 2161

Dysautonomia (Riley-Day syndrome)
effects of abnormal sympathetic nervous function on ventilatory response to hypoxia, 1153

Dyspnea
in chronic obstructive pulmonary disease, alterations in mechanical properties of lung during, 747

E

Electrodes
ion-exchange, determination by of ionized calcium in normal serum, ultrafiltrates, and whole blood, 318

Electrolyte absorption
transport of chloride, bicarbonate, sodium, and hydrogen in human ileum, 557

Electrolyte transport
and intestinal fluid, in human cholera, 183

Electrophysiology
of human internal anal sphincter, 41

Emphysema
alterations in mechanical properties of lung during dyspnea in, 747

Enterohepatic circulation
of bile salts, in rhesus monkey, effects of interruption of by biliary diversion, 232

Enzyme induction
rat liver alkaline phosphatase, mechanism of serum elevation in bile duct obstruction, 508

Enzyme secretion
pancreatic, basis of pancreozymin bioassay in man, potency of specific amino acids, 1558

Erythrocyte
antigen site density, hemagglutination study, 87
effect of thyroid hormones on synthesis of 2,3-diphosphoglyceric acid in, 1993

Erythrocytes
human, release of phospholipid fatty acid from, 1668

Erythropoiesis
nucleoside deaminase in, 2051

Erythropoietin
in anemia of bone marrow failure and polycythemia vera, 1986

Esophagus
human, influence of bolus temperature on motor function of, 243
of opossum, pharmacologic identification of lower sphincter of, 681

Estrogens
in blood, metabolism of by splanchnic organs, in dog, 2324

Ethacrynic acid
effect on sodium flux in red blood cells, 1804

Ethanol
effects of chronic feeding of on serum lipoprotein metabolism, in rat, 769
effects of metabolism of ketone bodies, 1775

Ether linkage
integrity of during thyroxine metabolism, in man, 373

Exocrine immunoglobulins
proteolytic degradation of, 1374

Extracellular fluid volume
influence of expansion of and uremia on bicarbonate reabsorption, in man, 988

F

Factor V
anticoagulants, clinical, biochemical and immunological observations, 1578

Fasting
and diet, effect of on insulin secretion in rat, 881
humans, glucagon levels and metabolic effects in, 2256

Fat cells
human, metabolic and morphologic study, 1213

Fats
unsaturated dietary, effects of on absorption, excretion, synthesis, and distribution of cholesterol, in man, 1135

Fatty acid metabolism
in human platelets, 128

Fatty acids
long-chain free, uptake by human platelets, 1489
release from phospholipids of human erythrocytes, 1668

Ferritin
metabolism in reticulated-siderocytes, 517

Ferrokinetics
biologic model for plasma iron exchange in man, 197

Fetal development
thyroid function during, 1790

Fetal hemoglobin
in Greek type of hereditary persistence of fetal hemoglobin with and without concurrent beta-thalassemia, 1035

Fetus
secretion by and transplacental passage of aldosterone, 1389
subhuman primate, effects of insulin on, 1517

Fever
in vitro pyrogenic properties of endogenous steroids of man, 2418

Fibrin
intraglomerular formation in lipoid nephrosis, 251
Fibrinogen
effect of corticosteroids on synthesis of in hepatocellular disease, 2198
labeled, isotopic studies of therapeutic anticoagulation with coagulating enzyme, 1872
Fibroblast culture
study of pyruvate decarboxylase defect in child with intermittent movement disorder, 423
Fluid
intestinal, and electrolyte transport, in human cholera, 183
Fluid reabsorption
in loop of Henle, in rats with chronic hypertension, 1200
Free fatty acids
hepatic metabolism of, in normal and diabetic dogs, 537
and ketone bodies, effect of insulin and acute diabetes on, in fasting rat, 1685
splanchnic metabolism of, in normotriglyceridemic and hypertriglyceridemic humans, 2017
transport in plasma of man, theoretical analysis, 2298
Furosemide
effect on sodium flux in red blood cells, 1804

G

γG3 myeloma
aggregation of γG3 proteins, relevance to hyperviscosity syndrome, 610
β-Galactosidases
deficiency of in gargoylism, 216
Galactosides
hydrolysis of, and tissue accumulation of galactose- and mannose-containing compounds in gargoylism, 216
Gamma G globulin subgroup
composition of glomerular deposits in human renal disease, 1103
Gamma globulin
aggregate-free, effect of prior treatment with on immunologic response of graft recipients to antilymphocyte globulin, 1589
cell-bound, detection of on complement-coated human red cells, 898
human, receptors for on human neutrophils, 2165
Gamma globulin subgroups
and gene defects in patients with primary hypogammaglobulinemia, 1957
Gargoylism
hydrolysis of beta-galactosides and tissue accumulation of galactose- and mannose-containing compounds, 216
Gastrointestinal physiology
pharmacologic identification of lower esophageal sphincter, in opossum, 681
Gastrointestinal stimulus
to release of insulin, 524
Gene defects
and gamma globulin subgroups in patients with primary hypogammaglobulinemia, 1957
Genetic disease
hereditary defect of pyruvate decarboxylase in child with cerebellar and choreoathetoid movement disorder, 423
Genetics
interactions of alpha and beta thalassemia genes, 635
Globin synthesis
stimulation of, effects of iron, cobalt, hemin, and plasma on reticulocytes and nucleated erythroid cells, 701
Glomerular deposits
gamma G globulin subgroup composition of, in human renal diseases, 1103
Glomeruli
of patients with active systemic lupus erythematosus nephritis, localization of fluorescein-labeled antinucleoside antibodies in, 2106
Glomerulonephritis
acute, antigenic streptococcal plasma membrane components in, 762
characterization of human anti-glomerular basement membrane antibodies in, 308
Glucagon
effect of on in vitro secretion of calcitonin, 1368
effects of experimental heart failure on capacity of to augment myocardial contractility and activate adenyl cyclase, 999
effects of on adenosine monophosphate and guanosine monophosphate in human plasma and urine, 2237
levels of and metabolic effects in fasting man, 2256
radioimmunoassay for study of pancreatic alpha cell function in normal and diabetic subjects, 837
Glucocorticoids
regulation of thyroid function in man, 1922
Gluconeogenesis
by kidney, early effects of metabolic acidosis on renal metabolism, in rat, 943
by renal cortex, relation to glutamate content and ammonia production, 1967
Glucose
effects of on urinary calcium and magnesium excretion, in man, 1458
impedance to uptake of in normal and diabetic subjects, 2151
metabolism, by human alveolar macrophages, effect of smoking on, 2086
reduced in brain, normal in plasma, in salicylate poisoning, 2139
transpulmonary arteriovenous differences of, in proliferative lung disease, 1305
Glucose-galactose
congenital malabsorption, renal and intestinal hexose transport in, 576
Glucose oxidase
coating on latex spherules, for correction of metabolic deficiencies in leukocytes of patients with chronic granulomatous disease, 865
Glucose oxidation
comparative study of in human and guinea pig leukocytes, 692
Glucose-6-phosphate dehydrogenase
deficiency of, and acetylsalicylic acid–induced hemolysis, 1334
Glutamate content
in renal cortex, relation to gluconeogenesis and ammonia production, 1967
Glycogenesis
in human platelets, 140
Glycolysis
metabolism of isolated human eccrine sweat glands, 1880
Glyconeogenesis
in human platelets, 140
Goiter
development of, with lithium treatment, 1357
Gonadotropins
serum radioimmunoassay, in disorders of sexual development, 1847
Goodpasture's syndrome
characterization of human anti-glomerular basement membrane antibodies eluted from glomerulonephritic kidneys, 308
Graft recipients
characterization of human antilymphocyte globulin, effect of

prior treatment with aggregate-free gamma globulin, 1589

Granulomatous disease
chronic, correction of metabolic deficiencies in leukocytes of patients with, 865

Graves' disease
distribution kinetics of triiodothyronine in patients with, 1041

Growth hormone
response to exercise in diabetes mellitus, 1467

Guanethidine
inhibition by, of norepinephrine pump in man, 1596

Guanosine monophosphate
in human plasma and urine, effects of glucagon on, 2237
kinetic parameters and renal clearance of in man, 2222

H

Heart disease
valvular, left atrial booster function in, 1605

Heart failure
effect on capacity of glucagon to augment myocardial contractility and activate adenyl cyclase, 999

Heinz body
hemaglobin heme loss in formation of, 2008

Hemagglutination
significance of erythrocyte antigen site density, 87

Hematocrit
effects of on renal hemodynamics and sodium excretion in hydropenic and volume-expanded dogs, 1656

Heme
catabolism of in vivo, comparison of simultaneous production of bilirubin and carbon monoxide, 914
loss of from hemoglobin in Heinz body formation, 2008
removal from plasma, in normal man and patients with intravascular hemolysis, 5

Hemodynamics
alternating contractile state in pulsus alternans, 1166
coronary blood flow and myocardial metabolism in coronary shock, response to norepinephrine and isoproterenol, 1885
determinants of pulmonary blood volume, 170
effect of physical training on mechanical and metabolic performance of rat heart, 1859
effects of elevated cerebrospinal fluid pressure, alterations with adrenergic blockade, 1324
effects of increased left ventricular filling pressure in patients with acute myocardial infarction, 1539
effects of phenoxybenzamine in anesthetized dogs, 2036
effects of pneumonia on expansion of plasma volume, 799
effects of pneumonia on normal and hypodynamic responses, 791
effects of ventricular defibrillation, in dogs, 282
experimental myocardial infarction, acute depression and subsequent recovery of left ventricular function, in dogs, 55
left atrial booster function in valvular heart disease, 1605
pressure-flow studies in man, effect of atrial systole on left ventricular function, 472
reduction of left ventricular compliance in healing phase of myocardial infarction, 1316
role of inotropic variation in ventricular function during atrial fibrillation, 738

Hemoglobin
adult and fetal, effects of deoxygenation of on synthesis of red cell 2,3-diphosphoglycerate, 400
fetal, in Greek type of hereditary persistence of fetal hemoglobin with and without concurrent beta-thalassemia, 1035
heme loss in Heinz body formation, structural abnormalities and unstable forms, 2008
and oxygen affinity, effect of 2,3-diphosphoglycerate on in cardiac disease, 1349
stability, denaturation by oxidant dyes, heat, and alkali, 2369

Hemoglobin A
interaction with 2,3-diphosphoglycerate, 1088

Hemoglobin A_2
interaction with 2,3-diphosphoglycerate, 1088

Hemoglobin C
interaction with 2,3-diphosphoglycerate, 1088

Hemoglobin Chesapeake
interaction with 2,3-diphosphoglycerate, 1088

Hemoglobin F
interaction with 2,3-diphosphoglycerate, 1088

Hemoglobin I
diminished synthesis of alpha chain mutant, 2218

Hemoglobin $M_{Milwaukee-1}$
interaction with 2,3-diphosphoglycerate, 1088

Hemoglobin S
interaction with 2,3-diphosphoglycerate, 1088

Hemoglobin synthesis
stimulation of, effects of iron, cobalt, hemin, and plasma on reticulocytes and nucleated erythroid cells, 701

Hemoglobins
human, A, A_2, S, C, F, Chesapeake, and $M_{Milwaukee-1}$, interaction of with 2,3-diphosphoglycerate, 1088

Hemolysis
induced by acetylsalicyclic acid in patients with glucose-6-phosphate dehydrogenase deficiency, 1334
intravascular, disposal of plasma heme, 5
of "stress" reticulocytes, source of erythropoietic bilirubin formation, 1025

Hemorrhagic hypotension
effect of retransfusion on intrarenal distribution of blood flow after, in dogs, 2205

Hepatic distribution volume
and unidirectional clearance of triiodothyronine in euthyroid subjects and patients with Graves' disease, 1041

Hepatic metabolism
metabolism of sulfobromophthalein sodium, effect of sodium taurocholate on, role of bile flow, 206

Hereditary defect
of intestinal iron transport, in mice with sex-linked anemia, 1869

Hexose monophosphate shunt
stimulation of, for correction of metabolic deficiencies in leukocytes of patients with chronic granulomatous disease, 865

Hexose transport
renal and intestinal, in familial glucose-galactose malabsorption, 576

Homocystinuria
cystathionine synthase deficiency, effect of pyridoxine, 1762

Hormone
synthesis and secretion by rat parathyroid glands in tissue culture, 1639
thyroid stimulating, during fetal development, 1790

Human fibroblasts
effects of allopurinol and oxipurinol on purine synthesis in, 602

Human plasma alpha lipoprotein
new method for isolation of nonidentical protein subunits of, 365
Human platelet
granule cationic extract, increased vascular permeability produced by, 274
Hydrocortisone
choleresis, in dog, 1714
effect of on immunoglobin metabolism, 1679
inhibitor of NADH oxidase, effect on polymorphonuclear leukocyte bactericidal activity, 1381
Hydrogen
transport in human ileum, 557
17α-Hydroxylase
male pseudohermaphroditism due to deficiency of, 1930
O-Hydroxylysyl glycoside
relationship of levels of to collagen metabolism, in human urine, 1497
17-Hydroxypregnenolone
blood levels and production rate, in man, 1999
Hydroxyproline polypeptides
related to collagen synthesis, urinary, 716
Hypercalcemia
urine concentration and dilution in, 1447
Hypercatabolism
of normal IgG by patients with connective tissue diseases, 454
Hyperglycemia
in rabbits with thermal injury to ear chambers, influence of hyperosmolality on acute inflammatory response, 433
Hyperlipemia
and fatty liver, in rat, effects of chronic ethanol feeding on, 769
Hyperlipoproteinemia
and atherosclerosis, body cholesterol metabolism in, long-term decay of serum cholesterol radioactivity, 346
effects of treatment of on peripheral circulation, 1007
transport of very low density triglycerides in, effects of carbohydrate-rich diet, 2281
type III, abnormal chylomicrons in, 1853
Hypermagnesemia
suppression of parathyroid gland activity by, 1619
Hyperosmolality
secondary to hyperglycemia, influence of on acute inflammatory response induced by thermal injury to ear chambers of rabbits, 433
Hypertension
aldosterone secretion during salt loading in patients with, relation to plasma renin activity, 1415
fluid reabsorption in loop of Henle and urinary excretion of sodium and water in, 1200
Hyperthyroidism
peripheral metabolism of triiodothyronine in, 643
Hyperviscosity syndrome
aggregation of γG3 proteins, 610
in IgG myeloma, role of protein concentration and molecular shape, 15
Hypocapnia
cerebrovascular response to, in normal man, 2362
Hypogammaglobulinemia
leukocytic function in, 1528
primary, gamma globulin subgroups and gene defects in patients with, 1957
Hypokalemia
effect on urine acidification, 813
Hypotension
hemorrhagic, effect of retransfusion on intrarenal distribution of blood flow after, in dogs, 2205
idiopathic postural, physiology of and new mode of therapy, 1341
Hypothyroidism
exaggerated natriuretic response to saline infusion in, 1224
Hypotonicity
effect of on energy substrate metabolism in human platelets, 119
Hypoxanthine-guanine phosphoribosyltransferase
excessive purine biosynthesis in deficiency of, 968
Hypoxia
acute hypocapnic and eucapnic, cerebrovascular response to, in normal man, 2362
effect of on ventilatory response, in normal man, 1061
effect on vascular responsiveness in man, 1252
effects of abnormal sympathetic nervous function on ventilatory response to, 1153

I

IgG
hypercatabolism of in systemic lupus erythematosus, 708
normal, hypercatabolism of by patients with connective tissue diseases, 454
subclasses in man, metabolic properties of, 673
IgG multiple myeloma
immunoglobulin synthesis and total body tumor cell number in, 1114
IgM
catabolism of in patients with connective tissue diseases, 454
hypercatabolism of in rheumatoid arthritis, 708
Ileum
human, transport of chloride, bicarbonate, sodium, and hydrogen in, 557
Immunoglobulin
effect of hydrocortisone on metabolism of, 1679
metabolism in systemic lupus erythematosus and rheumatoid arthritis, 708
Immunoglobulin M
biosynthesis of low molecular weight (7S) and high molecular weight (19S), 150
Immunoglobulin synthesis
by salivary gland lymphoid cells in Sjögren's syndrome, 49
and total body tumor cell number in IgG multiple myeloma, 1114
Immunoglobulins
exocrine and serum, proteolytic degradation of, 1374
Infection
abnormal C'3 metabolism in patient with increased susceptibility to, 1975
site of, influence on immune response to group A streptococci, 1405
Infections
recurrent pyogenic, in patients with hypogammaglobulinemia, leukocytic function in, 1528
Inflammation
influence of hyperosmolality secondary to hyperglycemia upon acute inflammatory response induced by thermal injury to ear chambers of rabbits, 433
Insulin
effect of on plasma free fatty acids on ketone bodies, in fasting rat, 1685
effects on pregnant and fetal subhuman primate, 1517
gastrointestinal stimulus to release of, 524
and glucagon, effect of on amino acid transport across bone marrow cell membranes, 752
impedance in normal and diabetic subjects to glucose uptake mediated by, 2151
in vitro inhibition by diphenylhydantoin of secretion of, 1942

in vitro synthesis and release of, by rat islets of Langerhans, 1394
pork and beef, proinsulin and connecting peptides, biological and immunological properties of, 979
response to secretion stimulation, in man, 2276
secretion in rat, effect of fasting, diet, and actinomycin D on, 881
theophylline-induced release patterns from rat pancreas in vitro, 2097

Interferon
role of in protective effect of double-stranded polyribonucleotide against intranasal vesicular stomatitis virus challenge in mice, 1565

Intestinal
hexose transport in familial glucose-galactose malabsorption, 576

Intestinal disaccharidases
effect of colchicine on, correlation with biochemical aspects of cellular renewal, 530

Intestinal transport
of sugars and amino acids in diabetic rat, 96

Intestine
fluid and electrolyte transport, in human cholera, 183
of mice with sex-linked anemia, hereditary defect of iron transport in, 1869
small, effect of renal insufficiency on active transport of calcium by, 1288

Iodine
inhibition by of thyroxine secretion by thyroid glands of patients with thyrotoxicosis, 78
measurement of thyroidal release of, in man, 1912

Iodine-labeled proteins
short-term measurement of plasma catoblic rates, 1903

Iodothyronines
effect of lithium on, 1357

Ion-exchange electrodes
determination by of ionized calcium in normal serum, ultrafiltrates and whole blood, 318

Iron
biologic model for plasma exchange of, in man, ferrokinetics, 197
effect on globin synthesis in reticulocytes and nucleated erythroid cells, 701
intestinal transport, hereditary defect of in mice with sex-linked anemia, 1869
role of ceruloplasmin in metabolism of, 2408

Isoproterenol
effects of on mechanical characteristics of lungs of normal man, 779

Isozymes
induction of rat liver alkaline phosphatase, mechanism of serum elevation in bile duct obstruction, 508

J

Jaundice
obstructive, characterization of protein moieties of low density lipoproteins in, 2396

Jejunum
human, mechanism of bicarbonate absorption and relationship to sodium transport in, 548

K

Ketone bodies
effects of ethanol on metabolism of, 1775
and free fatty acids, effect of insulin and acute diabetes on, in fasting rat, 1685

Kidney
distal tubular sodium reabsorption with and without volume expansion in man, 2336
effect of altered sodium concentration in distal nephron segments on renin release, 1630
effect of increased ureteral back-pressure on renal tubular sodium reabsorption, 2315
effect of retransfusion after hemorrhagic hypotension on intrarenal distribution of blood flow in dogs, 2205
intraglomerular fibrin, platelet aggregation, and subendothelial deposits in lipoid nephrosis, 251
relation of cortical gluconeogenesis, glutamate content, and production of ammonia, 1967
transtubular sodium and potassium transport in isolated rabbit renal collecting tubules, 1815

Kidney failure
myohemoglobinuric, micropuncture studies of recovery phase of, in rat, 730

L

Lactate
transpulmonary arteriovenous differences of, in proliferative lung disease, 1305

Lecithin: cholesterol acyltransferase deficiency
familial, plasma lipoproteins in, 1827

Leukemia
mono- and myelomonocytic, serum and urinary proteins, lysozyme (muramidase), and renal dysfunction in, 1694
tumor-specific transplantation antigens, in identical siblings, 2271

Leukocyte
function in hypogammaglobulinemia, 1528
mixed transformation reaction and leukemia, in identical siblings, 2271
polymorphonuclear, effect of NADH oxidase inhibitor (hydrocortisone) on bactericidal activity of, 1381

Leukocytes
human, chromate transport in, 1551
in ear chambers of rabbits, influence of hyperosmolality secondary to hyperglycemia upon acute inflammatory response induced by thermal injury, 433
in vitro pyrogenic properties of endogenous steroids of man, 2418
of patients with chronic granulomatous disease, correction of metabolic deficiencies in, 865
release of vitamin B_{12}-binding protein by, in man, 2250
respiration and glucose oxidation in, comparative studies in human and guinea pig, 692

Lidocaine
effect of on electrophysiological properties of ventricular muscle and Purkinje fibers, 63

Lipid droplets
in atherosclerotic fatty streaks of human aorta, 1479

Lipolysis and lipogenesis
from glucose in human fat cells of different sizes, 1213

Lipoprotein
alpha, of human plasma, new method for isolation of nonidentical protein subunits of, 365
very low density, triglyceride transport in hyperlipoproteinemia, effects of carbohydrate-rich diet, 2281

Lipoprotein metabolism
in rat serum, effects of chronic ethanol feeding on, 769

Lipoproteins
low density, in obstructive jaundice, characterization of protein moieties of, 2396
plasma, in familial lecithin:cholesterol acyltransferase deficiency, 1827

Lithium
antithyroid effects of, 1357

Liver
cirrhosis, proline and collagen content in, 2246

metabolism of free fatty acids, in normal and diabetic dogs, 537
metabolism of sulfobromophthalein sodium, effect of sodium taurocholate on, role of bile flow, 206

Liver disease
augmentation of albumin but not fibrinogen synthesis by corticosteroids in, 2198

Loop of Henle
fluid reabsorption in, in rats with chronic hypertension, 1200
sodium chloride and water transport in, 1838

Lung
alterations in mechanical properties of, during dypsnea in chronic obstructive pulmonary disease, 747
effect of smoking on phagocytosis, glucose utilization and ultrastructure of human alveolar macrophages, 2086
function and disease in byssinosis, 106

Lungs
acute effects of isoproterenol on mechanical characteristics of, in normal man, 779

Lupus erythematosus
active nephritis in patients with, localization of fluorescein-labeled antinucleoside antibodies in glomeruli, 2106

Lymphocyte
DNA polymerase activity as index of stimulation of, in Down's syndrome, 161

Lymphoid cells
of salivary gland, immunoglobulin synthesis by, in Sjögren's syndrome, 49

Lysozyme
(muramidase), in mono- and myelomonocytic leukemia, 1694

M

Macrophages
human alveolar, effect of smoking on phagocytic ability, glucose utilization, and ultrastructure of, 2086

Magnesium
effect of on in vitro secretion of calcitonin, 1368
effects of glucose ingestion and ammonium chloride acidosis on urinary excretion of, in man, 1458
suppression of parathyroid gland activity by, 1619

Melanoma
human subcutaneous metastatic, cell proliferation in, 1188
IgG multiple, immunoglobulin synthesis and total body tumor cell number in, 1114

Membrane
of bone marrow cells, kinetics of amino acid transport across, 752

Membranes
capillary basement, structure of in diabetics and sexual ateliotic dwarfs, 2161

Mice
with vesicular stomatitis virus, role of interferon in protective effect of double-stranded polyribonucleotide against intranasal challenge in, 1565

Mineralization
in calcifying cartilage, role of proteinpolysaccharides in regulation of, 2188

Monkey
insulin response in pregnancy, 1517

Motor end plate
in human skeletal muscle, cholinesterase activity of, 936

Motor function
of human esophagus, influence of bolus temperature on, 243

Multicompartmental analysis
of plasma free fatty acids and triglycerides, in man, 2298

Muscle
rat diaphragm, regulation of citrate content by pH, P_{CO_2}, and bicarbonate, 1647
rat skeletal, effect of alterations in level of thyroid activity on contractile properties of, 849
skeletal, human, cholinesterase activity of motor end plate in, 936

Myeloma proteins
metabolic properties of IgG subclasses, in man, 673

Myocardial infarction
acute depression and subsequent recovery of left ventricular function, in dogs, 55
effects of increased left ventricular filling pressure in patients with, 1539
efficacy and toxicity of digitalis in acute and healing phase in intact conscious dogs, 358
hemodynamics and myocardial metabolism in coronary shock, response to norepinephrine and isoproternol, 1885
reduction of left ventricular compliance in healing phase, 1316

Myocardium
effect of physical training on mechanical and metabolic performance of, 1859
effects of experimental heart failure on capacity of glucagon to augment contractility of, 999

Myohemoglobinuric renal failure
micropuncture studies of recovery phase of, in rat, 730

N

NADH oxidase inhibitor
hydrocortisone, effect of on polymorphonuclear leukocyte bactericidal activity, 1381

Natriuretic hormone
effect of dialysates and ultrafiltrates of plasma of saline-loaded dogs on toad bladder sodium transport, 926

Natriuretic response
to saline infusion in hypothyroidism, 1224

Neoplastic disease
human metastatic melanoma, cell proliferation in, 1188

Nephritis
in patients with active systemic lupus erythematosus, localization of fluorescein-labeled antinucleoside antibodies in glomeruli, 2106
overt and asymptomatic, complement levels in after streptococcal skin infection, 1178

Nephrosis
lipoid, intraglomerular fibrin, platelet aggregation, and subendothelial deposits in, 251

Neurohypophysial hormones
identification of by antisera, 828

Neutrophils
human, receptors for human gamma globulin on, 2165

Norepinephrine
and isoproterenol, response to following myocardial infarction, 1885

Norepinephrine pump
in man, inhibition of by guanethidine and related agents, 1596

Nucleic acid synthesis
in cultured human cells, effects of allopurinol and oxipurinol on, 602

Nucleoside deaminase
marker for stress erythropoiesis in mouse, 2051

O

Oligomycin
effect on sodium flux in red blood cells, 1804

Oxipurinol
effect of on purine synthesis in cultured human cells, 602

Oxygen-15
in vivo measurement of regional cerebral oxygen utilization by means of oxyhemoglobin labeled with, 381

Oxygen affinity
of blood in sickle cell anemia, effect of 2,3-diphosphoglycerate on, 806

Oxytocin
identification of with antisera, 828

P

Pancreas
of normal and diabetic subjects, studies of alpha cell function in, 837
substrate modification of theophylline-induced insulin release from, 2097

Pancreozymin
bioassay in man based on pancreatic enzyme secretion, potency of specific amino acids, 1558

Papillary muscle
of ventricle and Purkinje fiber, effect of lidocaine on electrophysiological properties of, 63

Parathyroid
effect on serum and urinary calcium during phosphate depletion, 1073

Parathyroid gland
suppression of activity of by hypermagnesemia, 1619

Parathyroid hormone
effects of on plasma and urinary adenosine monophosphate in man, 2387
role of phosphate in secretion of, in man, 2146
synthesis and secretion by rat parathyroid glands in tissue culture, 1639

Peroxidative metabolism
catalase-dependent, in alveolar macrophage during phagocytosis, 1280

pH
and P_{CO_2}, and bicarbonate, regulation by of citrate content in rat diaphragm, 1647

Phagocytosis
by human alveolar macrophages, effect of smoking on, 2086
by polymorphonuclear leukocyte, effect of NADH oxidase inhibitor (hydrocortisone) on, 1381
catalase-dependent peroxidative metabolism in alveolar macrophage during, 1280
leukocytic function in hypogammaglobulinemia, 1528
respiration and glucose oxidation during, comparative study of human and guinea pig leukocytes, 692

Phenoxybenzamine
hemodynamic effects of, in anesthetized dogs, 2036

Phosphate
role in secretion of parathyroid hormone, in man, 2146

Phosphate depletion
changes in serum and urinary calcium during, 1073

Phosphatidylinositol
biosynthesis of in human platelets, 1949
biosynthesis of precursor cytidine diphosphate diglyceride by human platelets, 392

Phospholipid
fatty acid, release of from human erythrocytes, 1668

Physical training
effect of on mechanical and metabolic performance of rat heart, 1859

Phytohemagglutinin
response of lymphocytes to, measured by DNA polymerase activity, in Down's syndrome, 161

Placenta
passage across and fetal secretion of aldosterone, 1389

Plasmin
$\bar{C}1$ inactivator inhibition by, 568

Platelet granules
increased vascular permeability produced by cationic extract from, 274

Platelets
detection of thrombopoietic activity in plasma by stimulation of suppressed thrombopoiesis, 1709
factors involved in aggregation and retraction of, 2068
human, biosynthesis of cytidine diphosphate diglyceride by, 392
human, biosynthesis of phosphatidylinositol in, 1949
human, fatty acid metabolism in, 128
human, fresh and stored, energy substrate metabolism in, 119
human, glycogenesis and glyconeogenesis in, 140
human, utilization of long-chain free fatty acids by, 1489

Plethysmograph
body, for measurement of pulsatile uptake of carbon monoxide in human lung, 335
body, water-filled, for measurement of pulmonary capillary blood flow during changes of intrathoracic pressure, 1237

Pneumonia
hemodynamic effects of, expansion of plasma volume, 799
hemodynamic effects of, normal and hypodynamic responses, 791

Polycythemia vera
erythropoiesis in, 1986

Polyribonucleotide
double-stranded, role of interferon in protective effect of against intranasal vesicular stomatitis virus challenge in mice, 1565

Postural hypotension
physiology of and new mode of therapy, 1341

Potassium
effect of depletion of on urine acidification, 813
effect of on plasma renin in normal and hypertensive subjects, 2128
transtubular transport, in isolated rabbit renal collecting tubules, 1815

Potassium balance
and renin secretion, 2119

Potassium deficiency
chronic, effects of on plasma renin activity, 1510

Potassium depletion
urine concentration and dilution in dogs with, 1447

Pregnancy
effects of on carbohydrate metabolism by adipose tissue, 1438
regulation of renal excretion of sodium during, 871

Proinsulin
human serum, response to glucose tolerance test, 497
in vitro synthesis and release of, by rat islets of Langerhans, 1394
porcine, biological activity of in rats, 487
and pork and beef insulin, and connecting peptides, biological and immunological properties of, 979

Proline
and collagen content in human liver cirrhosis, 2246

Prostate
hypertrophic, in dog, formation and content of dihydrotestosterone in, 1746
hypertrophic, in man, formation and content of dihydrotestosterone, 1737

Protein
cationic, from human platelet granules, increased vascular permeability produced by, 274
vitamin B_{12}–binding, release of by human leukocytes in vitro, 2250

Protein concentration
and molecular shape, hyperviscosity syndrome in IgG myeloma, 15

Protein moieties
of low density lipoproteins in obstructive jaundice, 2396

Protein reabsorption
in proximal and distal tubules of rat kidney, 1

Protein subunits
of human plasma alpha lipoprotein, new method for isolation of, 365

Protein synthesis
induction of rat liver alkaline phosphatase, mechanism of serum elevation in bile duct obstruction, 508

Proteinpolysaccharides
in regulation of mineral phase separation in calcifying cartilage, 2188

Proteins
plasma, iodine-labeled, short-term measurement of catabolic rates, 1903
serum and urinary, lysozyme (muramidase), and renal dysfunction in mono- and myelomonocytic leukemia, 1694

Proteolysis
degradation of exocrine and serum immunoglobulins, 1374

Pseudohermaphroditism
male, 17α-hydroxylase deficiency, 1930

Pulmonary blood flow
during changes of intrathoracic pressure, water-filled body plethysmograph for measurement of, 1237
pulsatile uptake of carbon monoxide in human lung, 335

Pulmonary blood volume
determination of by radiocardiography, 170

Pulmonary disease
arteriovenous differences of lactate, pyruvate, and glucose, 1305
chronic obstructive, alterations in mechanical properties of lung during dyspnea in, 747
gas exchange and comparison of Fick and dye cardiac outputs, 1311

Pulmonary function
in patients with acromegaly, 1051

Pulmonary physiology
acute effects of isoproterenol on mechanical characteristics of lungs in normal man, 779

Pulsus alternans
alternating contractile state in, 1166

Purine
biosynthesis, in hypoxanthine-guanine phosphoribosyltransferase deficiency, 968
synthesis, in cultured human cells, effects of allopurinol and oxipurinol on, 602

Pyelonephritis
experimental *E. coli*, effect of water restriction and acidosis, 21
urinary concentrating ability in, 1427

Pyridoxine
effect of on homocystinuria due to cystathionine synthase deficiency, 1762

Pyruvate
transpulmonary arteriovenous differences of, in proliferative lung disease, 1305

Pyruvate decarboxylase
hereditary defect of, in child with cerebellar and choreoathetoid movement disorder, 423

R

Radioimmunoassay
of human plasma retinol-binding protein, 1754

Rat
parathyroid glands, hormone synthesis and secretion by in tissue culture, 1639

Red blood cell
ferrokinetics of, biologic model for plasma iron exchange, in man, 197
synthesis of 2,3-diphosphoglycerate, effects of deoxygenation of adult and fetal hemoglobin on, 400

Red blood cells
complement-coated, detection of cell-bound antibody on, 898
deficient in glucose-6-phosphate dehydrogenase, acetylsalicyclic acid–induced hemolysis in, 1334
2,3-diphosphoglycerate in, and changes in hemoglobin-oxygen affinity in cardiac disease, 1349
effects of iron, cobalt, hemin, and plasma on hemoglobin synthesis in, 701
effects of transport inhibitors on sodium flux in, 1804
hemolysis of "stress" reticulocytes, source of erythropoietic bilirubin formation, 1025
in sickle cell anemia, effect of 2,3-diphosphoglycerate on oxygen affinity of, 806
nucleoside deaminase in, 2051
result of interactions of alpha and beta thalassemia genes, 635
rheology in sickle cell anemia, 623
survival studies in hereditary spherocytosis, 666

Red cell volume
and erythropoietin, in anemia of bone marrow failure and polycythemia vera, 1986

Reflexes
autonomic, and vascular reactivity in experimental scurvy, in man, 298

Renal
hexose transport in familial glucose-galactose malabsorption, 576

Renal clearance
of plasma adenosine monophosphate and guanosine monophosphate, in man, 2222

Renal diseases
human, gamma G globulin subgroup composition of glomerular deposits in, 1103

Renal dysfunction
in mono- and myelomonocytic leukemia, 1694

Renal failure
bone composition in patients with, 442
myohemoglobinuric, micropuncture studies of recovery phase of, in rat, 730

Renal hemodynamics
effects of hematocrit on, in hydropenic and volume-expanded dogs, 1656

Renal insufficiency
effect on active transport of calcium by small intestine, 1288

Renal metabolism
early effects of metabolic acidosis, in rat, 943

Renin
activity in plasma, relation to aldosterone secretion during salt loading in patients with hypertension, 1415
effect of altered sodium concentration in distal nephron segments on release of, 1630
effect of potassium on, in normal and hypertensive subjects, 2128
effects of chronic potassium deficiency on plasma activity of, 1510
secretion of and potassium balance, 2119

Respiration
acute effects of isoproterenol on mechanical characteristics of lungs in normal man, 779
effects of abnormal sympathetic nervous function on ventilatory response to hypoxia, 1153

Respiratory mechanics
and dust exposure in byssinosis, 106

Response
immune, to group A streptococci, influence of site of infection on, 1405

Reticulocytes
containing siderotic granules, ferritin metabolism in, 517
"stress," hemolysis of, source of erythropoietic bilirubin formation, 1025

Retinol-binding protein
human, radioimmunoassay of, 1754

Retinopathy
diabetic, incidence in diabetes mellitus and sexual ateliotic dwarfism, 1096

Rheology
of oxygenated blood in sickle cell anemia, 623

Rheumatoid arthritis
immunoglobulin metabolism in, 708

S

Salicylate poisoning
reduced brain glucose with normal plasma glucose, 2139

Salivary gland
immunoglobulin synthesis by lymphoid cells of, in Sjögren's syndrome, 49

Salt loading
in patients with hypertension, relation of aldosterone secretion to plasma renin activity, 1415

Scurvy
in man, autonomic reflexes and vascular reactivity in, 298

Secretin
gastrointestinal stimulus to insulin release, 524
stimulation in man, response of insulin to, 2276

Selenomethionine-^{75}Se
detection of thrombopoietic activity in plasma by stimulation of suppressed thrombopoiesis, 1709

Serum enzymes
cholinesterase, variations in properties of in apparent homozygotes for silent cholinesterase gene, 479

Sexual development
radioimmunoassay of serum gonadotropins in disorders of, 1847

Short-term measurements
of catabolic rates, using iodine-labeled plasma proteins, 1903

Sickle cell anemia
effect of 2,3-diphosphoglycerate on oxygen affinity of blood in, 806
rheology of oxygenated blood in, 623

Siderocytes
reticulated, ferritin metabolism in, 517

Silent cholinesterase gene
variations in properties of serum enzyme in apparent homozygotes, 479

Sjögren's syndrome
immunoglobulin synthesis by salivary gland lymphoid cells in, 49

Skin infection
streptococcal, complement levels in overt and asymptomatic nephritis after, 1178

Smoking
effect on phagocytic ability, glucose utilization, and ultrastructure of human alveolar macrophages, 2086

Sodium
distal tubular reabsorption with and without volume expansion, 2336
effect of concentration of in distal nephron segments on renin release, 1630
effects of transport inhibitors on flux of in red blood cells, 1804
regulation of renal excretion of, during pregnancy, 871
transport in human ileum, 557
transtubular transport, in isolated rabbit renal collecting tubules, 1815

Sodium chloride
and water transport in descending limb of Henle, 1838

Sodium excretion
effects of hematocrit on, in hydropenic and volume-expanded dogs, 1656
in hypothyroidism, 1224
urinary, in rats with chronic hypertension, 1200

Sodium reabsorption
by renal tubules, effect of increased ureteral back-pressure, 2315

Sodium transport
by toad bladder, effect of dialysates and ultrafiltrates of plasma of saline-loaded dogs on, 926
relationship to bicarbonate absorption, in human jejunum, 548

Spherocytosis
hereditary, red cell survival studies in, 666

Sphincter
human internal anal, electrophysiology, 41
of lower esophagus of opossum, pharmacologic identification of, 681

Splanchnic organs
of dog, metabolism of plasma estrogens by, 2324

Starling's Law
effects of increased left ventricular filling pressure in patients with acute myocardial infarction, 1539

Steroid metabolism
male pseudohermaphroditism due to 17α-hydroxylase deficiency, 1930

Steroids
of man, pyrogenic properties of in vitro, 2418

Storage
of human platelets, effect of on energy substrate metabolism, 119

Streptococcal plasma membrane
antigenic components of, in acute glomerulonephritis, 762

Streptococci
group A, influence of site of infection on immune response to, 1405

Streptococcus
skin infection, complement levels in overt and asymptomatic nephritis in, 1178

Sulfobromophthalein sodium
effect of sodium taurocholate on hepatic metabolism of, role of bile flow, 206

Sweat glands
human eccrine, isolation and metabolism of, 1880

Sweating
human eccrine, calculation of recruitment and enhancement, 890

Systemic lupus erythematosus
hypercatabolism of normal IgG by patients with, 454
immunoglobulin metabolism in, 708

T

Temperature
influence of on human esophageal motor function, 243

Testicular feminization syndrome
testosterone metabolism, 31

Testosterone metabolism
in patients with testicular feminization syndrome, 31

Thalassemia
interactions of alpha and beta genes, 635
nature of fetal hemoglobin in Greek hereditary persistence of fetal hemoglobin with and without, 1035

Theophylline
effect of on in vitro secretion of calcitonin, 1368
effects on insulin release from rat pancreas in vitro, 2097

Thrombopoietic activity
detection of in plasma by stimulation of suppressed thrombopoiesis, 1709

Thyroid
diurnal variation of iodine release from, in man, 1912
effects of lithium on, 1357

Thyroid activity
effect of alterations of on intrinsic contractile properties of isolated rat skeletal muscle, 849

Thyroid function
fetal development of, 1790
role of glucocorticoids in regulation of, in man, 1922

Thyroid hormone
integrity of ether linkage during metabolism of, in man, 373

Thyroid hormones
effect of on erythrocyte 2,3-diphosphoglyceric acid synthesis, 1993
primary cellular factors influencing metabolism and distribution of, 1016

Thyroid tissue
effect of on in vitro secretion of calcitonin, 1368

Thyrotropin
effect of lithium on serum levels of, 1357

Thyroxine
conversion of to triiodothyronine in athyreotic human subjects, 855
deiodination rate, new method for measurement of acute alterations in, in man, 267
effects of on transport and peripheral metabolism of triiodothyronine, in man, 650
metabolism in man, effect of diphenylhydantoin, 1266

Thyroxine-binding globulin
during fetal development, 1790

Thyroxine metabolism
in man, integrity of ether linkage during, 373

Thyroxine secretion
by thyroid glands of patients with thyrotoxicosis, inhibition by iodine of, 78

Tissue culture
of human fibroblasts, effects of allopurinol and oxipurinol on purine synthesis in, 602
of rat parathyroid glands, hormone synthesis and secretion, 1639

Toad bladder
sodium transport, effect of dialysates and ultrafiltrates of plasma of saline-loaded dogs on, 926

Triglyceride
of plasma very low density lipoproteins, transport of in hyperlipoproteinemia, effects of carbohydrate-rich diet, 2281
transport in plasma of man, theoretical analysis, 2298

Triglycerides
of very low density lipoproteins, splanchnic production of in normotriglyceridemic and hypertriglyceridemic humans, 2017

Triiodothyronine
distribution kinetics of, studies of euthyroid subjects with decreased plasma thyroxine-binding globulin and patients with Graves' disease, 1041
effects of thyroxine load on transport and peripheral metabolism of, in man, 650
formation from thyroxine in athyreotic human subjects, 855
peripheral metabolism of in normal man and in patients with hyperthyroidism, 643
primary cellular factors influencing metabolism and distribution of, 1016

Tubular reabsorption
of protein, in rat kidney, 1

Tubules
collecting, isolated from rabbit kidney, transtubular sodium and potassium transport, 1815

Tumor
specific transplantation antigens in leukemia, in identical siblings, 2271

Tumor cell number
and immunoglobulin synthesis, in IgG multiple myeloma, 1114

Turtle bladder
defect in urinary acidification in, induced in vitro by amphotericin B, 596

U

Uremia
and extracellular fluid volume expansion, influence of on bicarbonate reabsorption, in man, 988

Ureteral back-pressure
effect on sodium reabsorption by renal tubules, 2315

Uric acid
interaction of monosodium urate with connective tissue components, 1783

Urine
acidification, defect in induced in vitro by amphotericin B, in turtle bladder, 596
acidification, effect of potassium depletion on, 813
calcification of collagen by, dependence on saturation with brushite, 2353
concentrating ability of in pyelonephritis, 1427
concentration and dilution of in hypokalemic and hypercalcemic dogs, 1447
human, relationship of O-hydroxylysyl glycoside levels in to collagen metabolism, 1497
hydroxyproline polypeptides related to collagen synthesis in, 716

V

Vascular disease
peripheral, autonomic reflexes and vascular reactivity in experimental scurvy, in man, 298

Vascular permeability
increase of, produced by human platelet granule cationic extract, 274

Vascular physiology
peripheral, responses of saphenous and mesenteric veins to administration of dopamine, 259

Vascular resistance
peripheral, role of, in reflexes mediated by baroreceptor system, 225

Vascular responsiveness
effect of acute hypoxia on, in man, 1252

Vasopressin
identification of with antisera, 828

Ventilation
and diffusing capacity, perfusion ratios in patients with alveolar capillary block, 408
in normal man, effect of hypoxia, 1061
response to hypoxia, effects of abnormal sympathetic nervous function, 1153

Ventricular defibrillation
hemodynamic effects of, in dogs, 282

Ventricular function
acute depression and subsequent recovery of, experimental myocardial infarction, in dogs, 55
role of inotropic variation in, during atrial fibrillation, 738

Vesicular stomatitis virus
in mice, role of interferon in protective effect of double-stranded polyribonucleotide against intranasal challenge of, 1565

Vitamin A
retinol-binding protein, radioimmunoassay of in human, 1754

Vitamin B_{12}
binding protein, release of by human leukocytes in vitro, 2250

Vitamin D deficiency
formation, mineralization, and resorption of bone in, 1122

Volume
extracellular, regulation of renal bicarbonate reabsorption by, 586

Volume expansion
effect on distal tubular sodium reabsorption, in man, 2336

W

Warfarin
identification of metabolites of in urine, in man, 907

Water
effect of restriction of, and acidosis, on experimental *E. coli* pyelonephritis, 21

Water diuresis
in adrenal insufficiency, role of antidiuretic hormone in inhibition of, reversal by gluco- and mineralocorticoids, 1724

Water transport
and sodium chloride in descending limb of Henle, 1838

White blood cells
human, chromate transport in, 1551

X

Xanthomas
diabetic eruptive, chylomicron origin of lipids accumulating in, biochemical and morphologic correlations, 2172
